

Amber Chiozza teaches various levels of drawing courses at Edmonds Community College, while also teaching classes at Lake Washington Institute of Technology in Kirkland, WA and LoneStar College in Houston, TX. She also manages her own art handling business, focusing on sculpture preservation and restoration around the greater Seattle area. In her own art practice, she focuses on native pollinating insects and plants in Washington State, creating her work to enlighten people on insect diversity and ecological awareness. Her current in-progress series highlights the various native bees of Washington State, which includes over 650 species. She incorporates her love of nature and art in her teaching practices, including lots of nature studies into her course work.
